PROFESSIONAL SUMMARY

Android Developer with 2+ years of experience designing and scaling high-performance, real-time applications using Kotlin, Jetpack Compose, and MVVM architecture. Strong track record of delivering revenue-impacting features, improving user engagement by up to 30%, and reducing crash rates through system refactoring and performance optimization. Experienced in modern Android architecture, cross-platform development with Kotlin Multiplatform and Compose Multiplatform, and building scalable community and live-interaction platforms used in production environments.

EDUCATION

B.Tech - CSE(AI&ML)

ABES Engineering College

2020 – 2024 | Ghaziabad, India

CGPA - 8.0

SKILLS

Performance & Debugging

LeakCanary, ANR Analysis, Memory Optimization, WebView Optimization

Core CS

Data Structures & Algorithms (400+ problems solved; strong problem-solving & optimized implementation skills)

PROFESSIONAL EXPERIENCE

Greenhorn Wellness Pvt. Ltd. (Eloelo)

SDE Internship - Android Developer

December 2023 – May 2024

- Contributed to the **chat application**, achieving a **50% increase in user engagement** by enhancing chat features and usability.
- Played a key role in the **game integration of Sheep Fight**, implementing **Agora SDK** for real-time audio communication and pusher for real time emoji interactions, which led to a **20% increase in user engagement**.
- Designed and developed a **modular system for MoEngage events** using the **proxy design pattern**, ensuring all events are triggered seamlessly from a centralized module for better maintainability and scalability.

Greenhorn Wellness Pvt. Ltd. (Eloelo)

SDE-1 - Android Developer

May 2024 – August 2025

- Built and scaled Community platform using **Jetpack Compose**, enabling creators to form and manage communities with interactive engagement flows; improved creator-follower interaction and increased community participation by ~25%.
- Redesigned onboarding with 12 A/B test variants**, enabling experiment-driven personalization; improved login-to-activation conversion by ~18%.
- Integrated real-time multiplayer Ludo game **using Agora SDK (audio) and Pusher (live reactions)**, increasing in-app engagement by ~20% and boosting average session duration.
- Implemented secure OTPLess and Gmail authentication**, achieving **99.6% login success rate** and improving user retention and conversion funnel performance.
- Launched chat monetization via real-time virtual gifting (diamond currency)**, streamlining sender-receiver interactions and increasing gifting activity by ~30%.
- Developed intelligent community **search using Jetpack Compose**, implementing priority query matching with smart fallback suggestions; improved zone discovery and join rate by ~22%.
- Migrated core modules (Home, Audio, Games) from XML to Jetpack Compose**, reducing UI boilerplate by ~35% and improving rendering performance and maintainability.
- Improved app stability and performance, **resolving ANRs and memory leaks (LeakCanary)**, fixing WebSocket authentication & retry logic issues, and reducing crash rate by ~28% while optimizing network usage.

Languages

Java, Kotlin

Android Development

Jetpack Compose, XML, Fragments, RecyclerView
MVVM, Clean Architecture, Multi-Module Architecture
Coroutines, Flow, StateFlow, SharedFlow
LiveData, ViewModel, Repository Pattern
Room, SQLite

Cross-Platform

Kotlin Multiplatform (KMP)
Compose Multiplatform (CMP)
SQLDelight

Networking & Real-Time

Retrofit, WebSockets, Socket.IO
Firebase (Auth, Firestore)
Agora SDK, Pusher
Payment Gateway Integrations

Libraries & Tools

- Hands-on experience with popular Android libraries: **Retrofit** (networking), **Glide** (image loading), **ExoPlayer** (media playback), and custom **caching** strategies for performance optimization.

Creative Frenzy Pvt Ltd.

SDE-1 - Android Developer

August 2025 – Present

- Architected and launched revenue-impacting features including an earnings-based dynamic “Free Tag” system (cross-module integration), in-house real-time games (**Lucky Coin S&B, Spot the City**), AI-powered dynamic party theme generator, and live upgrades (**dynamic seat expansion & Duo mode**), **increasing user engagement by ~22% and boosting in-app interactions.**
- Led end-to-end refactoring of the Groups module, implementing equity sharing, shareholder management, and member governance workflows; improved system reliability and reduced production issues by ~30%.
- Built “AstroHub” using **MVVM, Room, and Socket.IO**, enabling scalable real-time communication architecture and improving data consistency and responsiveness across high-traffic modules.
- Modernized data and payment infrastructure, **migrating SQLite to Room (reducing DB-related crashes by ~25%)** and implementing a plug-and-play international payment architecture via Hyper Checkout — enabling new gateway integrations without requiring app releases.
- Improved app stability and performance, resolving **32+ legacy crashes**, optimizing WebView rendering, and reducing overall crash rate by ~28%, resulting in smoother high-concurrency user experiences.

PROJECTS

Game Beast – Compose Multiplatform (CMP) Gaming Project

- Built a cross-platform gaming application using Compose Multiplatform (**CMP**) with **MVVM** and multi-module architecture, ensuring clean separation of concerns and scalability.
- Implemented shared business logic using **Kotlin Multiplatform (KMP)**.
- Integrated **SQLDelight** for type-safe, cross-platform data persistence, improving data consistency and compile-time query validation.
- Designed the architecture to be scalable, testable, and production-ready.

TalkVerse – Real-Time Chat Application

- Built a fully **Jetpack Compose**-based chat application using single-activity architecture, ensuring modern navigation and clean UI state management.
- Implemented real-time messaging using **Firebase (Authentication + Firestore/Realtime Database)** for instant message delivery and synchronization.
- Designed the app using **MVVM** architecture, leveraging Coroutines and Flow for reactive UI updates.
- Structured the project with clear separation of concerns for scalability and maintainability.
- Implemented secure login flow, real-time message updates, and smooth chat UI with Compose best practices.
